

PPA0113 | Angled chisel - Demolition tool XPLR+ODBC -L170/250mm- SDS+ (Hanging SDS clip)

Tool designed for all material removal work with a hammer drill in chisel mode. Robust and versatile, these tools guarantee excellent performance on the most common materials: reinforced concrete, concrete, brick, stone, tiles and plaster. The flat chisel, with its specific shape, allows for more ergonomic work and faster removal of material, especially in hard-to-reach areas.

Application

Concrete Tiles
